Construct numerical plots and calculate summaries to describe a distribution.

Key skills | Free preview

Learning target: Construct numerical plots and calculate summaries to describe a distribution.

A numerical display should preserve the measurement scale and reveal the distribution. Dot plots show repeated individual values, stem plots retain the observations, and histograms group values into intervals. The chosen scale and bins must be stated. A description should connect shape, location, variation and unusual observations to the original variable.

Try the mathematics

Task 1. Ten waiting times in minutes are 2, 3, 3, 4, 5, 5, 5, 6, 8, 9. Draw a dot plot and a histogram with bins [0,3), [3,6), [6,9), [9,12). State the mean, median and range.
