Understand domain and range requirements for displaying functions and relations with technology

Key knowledge | Free preview

Learning target: Understand domain and range requirements for displaying functions and relations with technology.

Use the population {0,2,4,6}, drawing uniformly and independently with replacement. Its mean is 3 and variance is 5. A simulation stores one mean per sample; a graph of $g(x)=\sqrt{(5/x)}$ provides a separate standard-error model. Record your procedure and actual outputs, using the supplied results only as checks.

Try the mathematics

Task 1. Graph $g(x)=\sqrt{(5/x)}$ using $0.5\leq x\leq 40$ and $0\leq g\leq 3.5$. Add the points for $n=1,2,8,32$. State the real function domain and the restriction relevant to sample size.

Continue with the full worksheet

The complete resource has 2 focused task sets and substantive worked solutions. Use an exercise book or print the A4 worksheet. This preview shows the first task without its full solution.
